Full range of Fusion tile* colour options to complement the door colours

*Our Fusion glass tiles are manufactured by hand and involved melting two or more layers of glass together, it is therefore common to get small air inclusions in the glass. These are a feature of the product and add dimension and contrast to the tile and should not be seen as a fault.

Colours shown may vary from actual door colour and samples are limited by the print process. We reserve the right to amend design without prior notification.
