VEKA BI-FOLD DOORS

A smooth transition between home and garden.

Enjoy a closer connection to the outside with the modern design and engineered quality of VEKA Bi-Fold Doors.

Designed for wide openings and modern living, VEKA bi-fold doors offer a versatile option for bright, open-plan spaces.

Whether hosting family or enjoying a quiet morning, these doors support a comfortable living environment with contemporary design features.

WHY CHOOSE **VEKA** BI-FOLD DOORS

OPEN UP TO 90% OF THE APERTURE.

Unlike sliding or French doors, bi-folds fold completely away, offering an uninterrupted transition from inside to out.

SLIM SIGHTLINES. MORE LIGHT.

Our slim, strong sash profiles mean you get more glass and less frame – helping to bring in more natural light.

FLEXIBLE CONFIGURATIONS.

Available in up to 7 sashes, with multiple opening styles to suit your space and how you use it.

SECURE AND STRONG.

Engineered for peace of mind, VEKA Bi-Fold Doors feature reinforced profiles and high-security locking systems, fully tested to PAS24 standards.

PROVEN THERMAL PERFORMANCE.

Multi-chambered PVCu profiles and glazing options are designed to support effective insulation and help improve energy efficiency throughout the year.

SMOOTH OPERATION.

Precision-engineered rollers and robust hardware are designed to support a smooth, reliable glide.

DESIGN CHOICE.

Choose from a broad selection of colours and finishes – from classic white to modern greys, woodgrains, or stronger tones. You can also opt for different colours inside and out to create a personalised look.

LOW MAINTENANCE & RECYCLABLE MATERIALS.

Made from PVCu that can be recycled, VEKA Bi-Fold Doors are designed to be straightforward to look after. No sanding, no painting – just a wipe-clean surface to help keep them looking their best.

ADD SPACE. WELCOME LIGHT. SUPPORT MODERN LIVING.

Whether you're renovating, extending, or building from scratch, VEKA Bi-Fold Doors offer a contemporary option for enhancing your home.

Fitted from your local
VEKA Installer.
