Introduction

We designed the Imagine Patio Door to support indoor and outdoor living by allowing natural light, space, and ventilation into the home. The system is manufactured in PVCu and incorporates features that support security, safety, and practicality.

The Imagine Patio Door is engineered to provide wide views of the garden with minimal impact on interior space. It includes integrated elements for quality, security, and thermal insulation, ensuring consistent performance across installations.

With a range of smooth colour and woodgrain options, a suite of specially selected handles and low easy-access option for a seamless transition from living space to garden, your Imagine Patio Door can be tailored to your style and needs.

Contact your installer today to discuss the many opening configurations, threshold choices or personalisation options available for your Imagine Patio Door.

“ CHOOSE FROM TWO, THREE OR FOUR PANE CONFIGURATIONS, DOUBLE OR TRIPLE GLAZING, INTERNAL OR EXTERNAL SLIDING SASHES. ”

02

Your Imagine Patio Door, *your way*

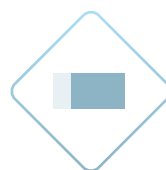

Your options:

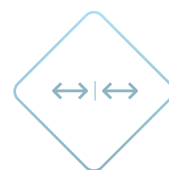

Multiple thresholds including a low easy access option

Add a midrail for letterplates, house numbers and other door furniture

Choose from two, three or four pane configurations

Option for both doors to slide

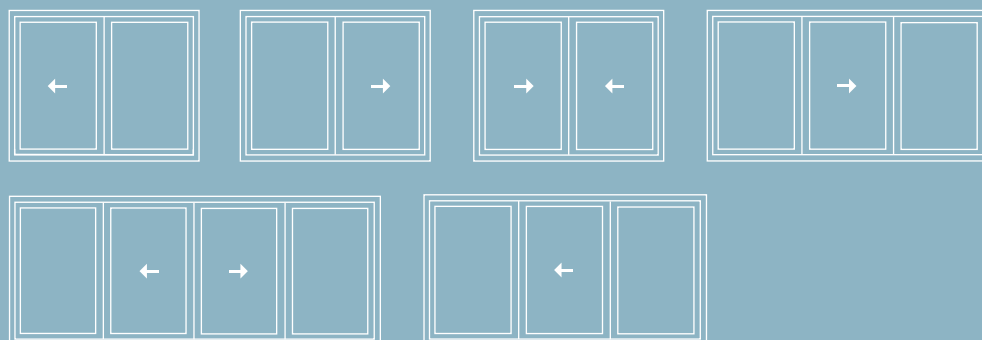

Internal or external sliding sashes

Double or triple glazing

These are just a few of the potential style variations available:

If you can't see the style you're looking for, ask your Installer for further options.

We designed the Imagine Patio Door to combine practical function with a choice of frame styles. Customers can select a bevelled frame for clean lines or a sculptured frame with rounded detailing to soften the appearance.

On the interior, the system incorporates a fully flush frame. This design supports a consistent finish and provides a neat plaster line within the room.

It's all in the detail!

Speak to your installer to find out about all the possible options.

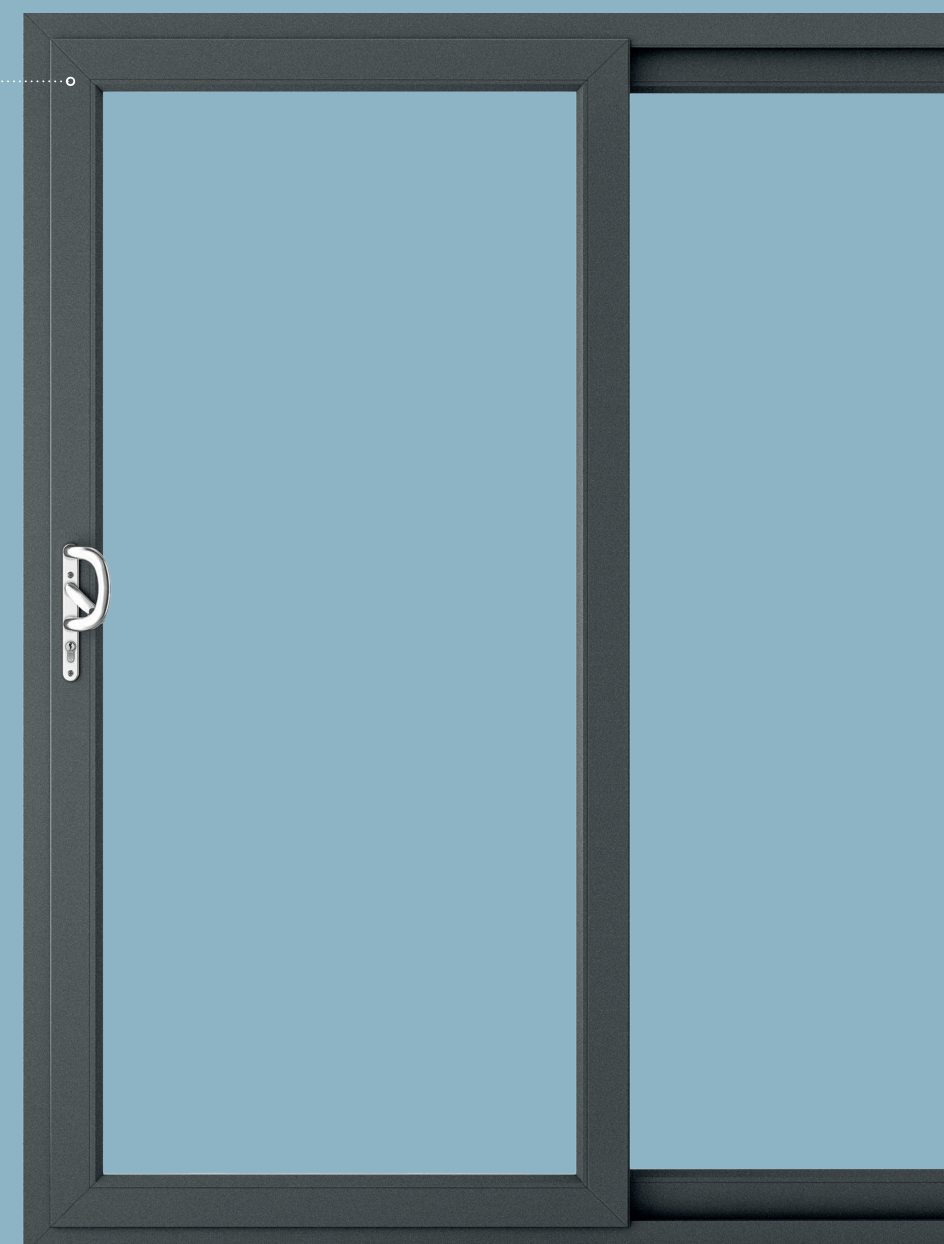

Bevelled

Angular lines give bevelled frames a clean, modern look.

Sculptured

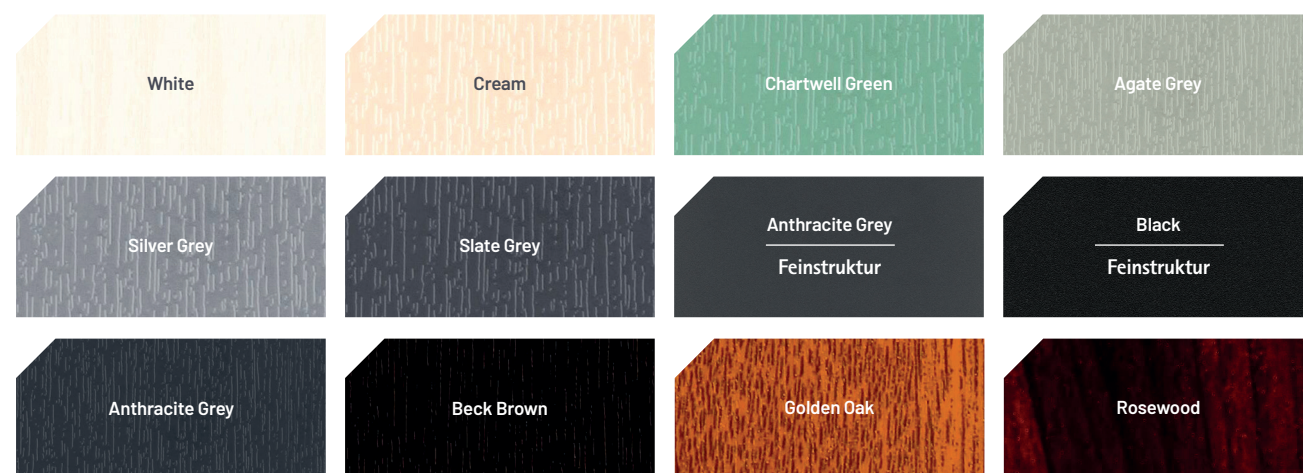

Softer, rounder lines give sculptured frames a traditional appearance.

“ YOU CAN EVEN CHOOSE TO HAVE ONE COLOUR ON THE OUTSIDE AND ANOTHER ON THE INSIDE! ”

04

pick a colour

We offer a collection of colours developed to suit a variety of homes. Customers can select smooth finishes for a contemporary appearance or woodgrain options designed to reflect the look of stained or painted timber.

The system also allows different colours to be applied to the exterior and interior surfaces.

For example, a darker finish such as Anthracite Grey can be chosen for the outside, while a lighter colour such as White may be selected for the inside to complement interior décor.

“ THE LOCKING COMPONENTS ON THE IMAGINE PATIO DOOR SUPPORT SECURITY BY CREATING A ROBUST BARRIER AGAINST INTRUDERS. ”

06

Hardware designed to support home security and safety

We developed the Imagine Patio Door in partnership with ERA, with locking components designed to meet PAS 24 requirements. The system incorporates security features while maintaining smooth operation and consistent design.

The extended lever on the handle engages a high-security interlock claw. By closing the door and locking the mechanism, the door is fully secured without the need for additional locking devices.

For ease of use, the Imagine Patio Door does not include high or low plunge bolts on the face of the frame. This design supports clear sightlines and straightforward opening.

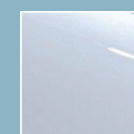

What is PAS 24?

Imagine Patio Doors are PAS 24 ready - meaning they have been designed to meet the British standard for window and door security.

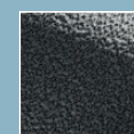

For advice on tailoring your handles to the style of your home and to complement your masonry, speak to our friendly team to discuss the many options available.

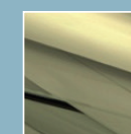

We offer a range of door handles available in multiple colours and finishes, including options such as chrome and graphite. These handles are designed to provide compatibility with different home styles and installations.

Hardex Graphite

Hardex Satin

Hardex Chrome

Hardex Bronze

08

Supporting home security and safety, & energy-efficient performance

Energy efficient

By using triple glazing, a U-Value of 1.1 can be achieved, supporting improved energy efficiency.

Imagine Patio Doors can reach an indicative WER rating of A+2 using double glazing and A+3 using triple glazing.

Safe and secure

We supply a PAS 24-ready locking kit developed in partnership with ERA. The components are designed to support security by creating a robust barrier against unauthorised entry.

ERA provides a guarantee for the locking kit. In the event of a component failure, compensation is available under the terms of that guarantee.

Weather resistant

Multiple chamber sashes, the option for triple glazing, double brush seals on all four sides and an innovative quadruple-seal interlock helps improve weather resistance.

Connecting outside with inside

We manufacture patio doors with sash sizes up to 1.5 metres. You can select up to four glazing panels, with the option for multiple sliding doors, supporting increased natural light in the home.

Your **ERA** Five Star Guarantee

We offer the Imagine Patio Door with a security guarantee provided in partnership with ERA. Under the terms of this guarantee, benefits of up to £5000 are available if locking components fail.

The system incorporates high-security locking mechanisms from ERA, designed to meet UK standards and support consistent performance.

5 *major benefits*

to you, the homeowner:

Savings on the cost of your home insurance

Most insurers recognise that having high security hardware on your windows and doors reduces the risk of forced entry - so they can reduce your premiums.

24/7 help when you need it

The ERA Five Star Guarantee gives you access to a FREE call out service operating 24 hours a day, 365 days a year.

Up to £1,000 home insurance excess paid

The quality, security and reliability of the locking components on the Imagine Patio Door means that they are guaranteed against force of entry for 10 years.

Up to £1,000 towards a repair or replacement

Under the terms of this guarantee, ERA will contribute up to £1000 toward the cost of repair or replacement if a locking component fails.

A £1,000 cheque to compensate you

Under the terms of this guarantee, if a break-in occurs due to the failure of the locking components, ERA will provide £1,000 compensation.
